

DENTAL BILLING SERVICES

It is compulsory to handle Dental verification to ensure the patient's insurance plan covers dental services, especially high-cost procedures, whether it needs prior authorization to avoid revenue loss for the provider after performing the service.

FS Medical Billing provides a summary sheet after verifications that would be helpful for the front desk staff to collect co-pay/deductible/non-covered service upfront even before performing services to help reduce patient A/R.

FS Medical Billing provides a complete breakdown of benefits for each insurance plan at the beginning of every year & updates the information in the system. Also, it reduces cost by just obtaining the eligibility for the patient with an existing insurance plan.
